

Wright's Intersectionality Wheel

1. Print both the wheels using rigid white card.
2. Cut out both wheels along the dotted line.
3. Position the smaller wheel on top of the larger wheel so that it is exactly in the centre.
4. Attach the wheels together by pushing a split pin through the black dot at the centre of the wheels.
5. Flatten and secure the back of the split pin using a strip of tape.
